

DHARAMPETH M. P. DEO MEMORIAL SCIENCE COLLEGE, NAGPUR

3.1.2. Number of departments having Research projects funded by government and non-government agencies during the year

ANY ADDITIONAL INFORMATION

Although the funded research projects are not being executed by the college, however indigenous research projects are very much carried out by some of the departments. The college is providing seed money for completion of these projects. And the output of these projects is very encouraging. There are three student centric research projects are implemented by the institute's departments namely, Vermi-Composting by Zoology department, floristic study by Botany department and software development by Computer Science department. These student centric research projects are working on the campus. Vermi-composting is working project in the institute and research papers was also published in reputed UGC CARE-LISTED journal, also mentioned in reports of vermi-composting. The floristic studies include the study of angiosperm plants from nearby areas of the campus as well as the villages in which NSS camps organized. The list of plants collected and studied with details are available with the Botany department. The students of computer science developed online portal for student's tests, assignments and examination data analysis. This helps the students and teachers of computer science department in pandemic. Due to pandemics, out of these three projects two were implemented during 2020-21.
