RAKHI FOR RAKSHAK A unique activity "Rakhi for Rakshak" as the name suggests the event was a thank you for all the protector who has fought even in pandemic for safety and betterment of us. All the members and board of directors came up with a unique idea of celebrating Rakhi with the Rakshaks like the policeman, nurses, doctors, sanitizers and also trees they said that these are all our rakshaks during this hard corona times! Even the members of the club took an active part and tied rakhi to community helpers and corona warriors nearby. All they did was tied the Rakhi to their respective rakshaks and clicked a photograph with them. Near about 80 participants took actively part in this activity. They collected huge number of photographs

Article on Artificial Intelligence (AI) and Robotics

By **Ganesh S. Kulkarni**

The artificial intelligence (AI) revolution is one of the most exciting and transformative technologies of our time. It has the potential to revolutionize every aspect of our lives, from healthcare and education to transportation and entertainment. As AI continues to advance, it is essential to understand its capabilities, limitations, and the ethical considerations that surround its development and use.

Artificial intelligence is a branch of computer science that aims to create machines that can think, learn, and solve problems on their own. This is achieved through a combination of algorithms, data, and processing power. AI is used in a wide range of applications, from simple tasks like spam filtering and recommendation systems to complex tasks like self-driving cars and medical diagnosis. The field of AI is constantly evolving, with new breakthroughs being made every day.

Robotics is an interdisciplinary field that combines engineering, computer science, and AI to create machines that can perform tasks that were previously only possible for humans. Robots are used in a variety of industries, from manufacturing and agriculture to healthcare and space exploration. They are designed to be flexible, adaptable, and capable of learning from their environment. Robotics is a rapidly growing field, with new robots being developed every day.

OUTCOME of the Activity with respect to mission vision of the institute and or academics:

Constitution Day (or Samvidhan Divas), also known as National Law Day, is celebrated in India on 26 November every year to commemorate the adoption of the Constitution of India. On 26 November 1949, the Constituent Assembly of India adopted the Constitution of India, and it came into effect on 26 January 1950. The Government of India declared 26 November as Constitution Day on 19 November 2015 by a gazette notification

On this occasion our college staff and students attended the online program organized by our RTM, Nagpur University at 10.00am. In this program, the chief guest Mr. E. Z. Khobragade, retired IAS officer explained why we should celebrate this day and also recited the preamble to the Constitution of India.

But college as a whole, Value Addition Committee of college organized online Quiz competition on the topic "Fundamental Rights and Duties". You Tube lectures were provided to student's day before quiz competition. The main intention behind this activity was to make the students, being the citizen of India, aware about their fundamental rights and fundamental duties. 234 students have taken part in this activity. Out of 234 students, 90.6% students said they have gone through the online lectures provided to them. 20 questions of 1 mark each were asked. Average score was 14 out of 20.

Vermi-composting activity is of immense importance in solid waste management which is beneficial for society and also keep college campus clean.

-It creates awareness among the students about clean environment and best from waste.

Analysis will help to know concentration of nutritive elements present in variety of cast generated by different waste for carbon and other important element present in different type of casts. It provides experiential knowledge of subject

ABSTRACT

This study evaluates concentration of essential elements (Mg, N, S, P, Ca, Zn, Fe, K, Organic carbon, C/N ratio) for plant growth present in the vermi-cast generated from flower waste and leaf waste. The flower waste from holy places and leaf waste from college yard was collected separately and cast generated from those waste analysed for the comparative study of different trace elements in cast generated from flower and leaf waste using IS and APHA method. Out of all the detected element N, the essential element for plants was found in high concentration in cast generated from flower waste (13.6 mg/L) than in leaf waste cast (56.16 mg/L) while potassium (108.30 mg/L) and zinc (41.5 mg/L) is in higher concentration in leaf waste cast than the flower waste cast (potassium 94.55 mg/L, Zinc 2.805 mg/L). This implies cast generated from flower waste and leaves waste separately will be beneficial in overcoming deficiencies of particular essential element in plants.
