INTRODUCTION

To slow the spread of COVID-19, the ministry of AYUSH recommends wearing a mask or cloth face covering—particularly in places where it is impossible to maintain social distancing (staying at least 6 feet away from others). The government advises washing your hands thoroughly or using hand sanitiser before putting on and after taking off face coverings.

Mask making activity conducted on 28th of august 2021 for the students of semester 5.

CONCLUSION

By showing such a demonstration it is a duty of a student's (as an extension worker) make rural people aware regarding use of mask at public places. Home maker should prepare homemade face mask and save money. They can start their own business.

- 2) Materials • Two 10"x6" rectangles of cotton fabric • Two 6" pieces of elastic (or rubber bands, string, cloth strips, or hair ties) • Needle and thread (or bobby pin) • Scissors • Sewing machine.
- 3) Cut out two 10-by-6-inch rectangles of cotton fabric. Use tightly woven cotton, such as quilting fabric or cotton sheets. T-shirt fabric will work in a pinch. Stack the two rectangles; you will sew the cloth face covering as if it was a single piece of fabric.

- 5) Run a 6-inch length of $\frac{1}{8}$ -inch wide elastic through the wider hem on each side of the cloth face covering. These will be the ear loops. Use a large needle or a bobby pin to thread it through. Tie the ends tight. Don't have elastic? Use hair ties or elastic head bands. If you only have string, you can make the ties longer and tie the cloth face covering behind your head.
- 6) Gently pull on the elastic so that the knots are tucked inside the hem. Gather the sides of the cloth face covering on the elastic and adjust so the mask fits your face. Then securely stitch the elastic in place to keep it from slipping.

Article on Artificial Intelligence (AI) and Robotics

By Geneah S. Kusumbe

The ethics of AI and robotics is often focused on "concerns" of various sorts, which is a typical response to new technologies. Many such concerns turn out to be "either/or" dilemmas: robots are too fast for souls; some are predictably wrong when they suggest that the technology will fundamentally change humans; telephones will destroy personal communication; writing will destroy memory; video cassettes will make going out redundant; some are broadly correct but moderately relevant; digital technology will destroy industries that make photographic film, cassette tapes, or vinyl records; but some are broadly correct and deeply relevant (Cars will kill children and fundamentally change the landscape). The task of an article such as this is to analyse the issues and to defuse the misconceptions.

Artificial intelligence is an approach to make a computer, a robot, or a product to think how **smart** humans think. The aim of AI is to improve computer functions which are related to **human knowledge**, for example, reasoning, learning and problem solving. Studies of artificial intelligence and robotics base their theory and analysis on constructs of automation, robotics, artificial intelligence and machine learning, and automation in the fields of literature, use of robotics, artificial intelligence and machine learning. Technological variables can be used both as independent and dependent variables. To examine factors that encourage or discourage the adoption and use of these technologies, impacts a variety of factors such as ethics, on labor, production, growth, and firm organization. It is important that organizational scholars are fully aware of such constructs in their studies and to avoid confounding the related but distinct constructs. Artificial intelligence and Machine learning are products of both science and myth. The idea that machines could think and perform tasks just as humans do is thousands of years old. The cognitive skills expressed in AI and Machine Learning systems are not new either. It may be better to view these technologies as the implementation of powerful and long-established cognitive principles through engineering.

Robotics is an interdisciplinary research area at the interface of computer science and engineering. **Robotics** involves design, construction, operation and use of robots. The goal of robotics is to design **intelligent machines** that can help and assist humans in their day-to-day lives and keep everyone safe. The **International Federation of Robotics (IFR)**, an international industrial group focused on commercial robotics, defines an industrial robot as an "automatically controlled, reprogrammable, multipurpose manipulator programmable in three or more axes, which can be either fixed in place or mobile for use in industrial automation applications." While this definition is a starting point, other robotics may differ on dimensions such as whether a robot must be automatically controlled or could be autonomous or whether a robot must be reprogrammable. At a broader level, any machine that can be used to carry out computer actions or tasks in an automatic manner may be considered a robot. Today we find most robots working for people in industries, factories, warehouses and laboratories. Robots are useful in many ways. Therefore, having robots helps business owners to be competitive, because robots are faster than humans, e.g. robot can build assemble a car etc.

1 Syllabus

What is the cloud? "Where is the cloud?" "Are we in the cloud now?"

In the simplest terms, cloud computing means storing and accessing data and programs over the Internet instead of your computer's local drive.

It is the delivery of on-demand computing resources (everything from applications to data and storage) over the Internet to a pay-for-use basis.

Nagpur University was established on 4th August, 1923 with six affiliated colleges and 927 students. During 1947, the number of students increased to about 9000 accompanied by the improvement and diversification of curricula and expansion in the range of subjects. It was in 1958 that some new Departments in Arts and Social Science faculties were opened; the major expansion, however, came in 1963 when several science and other teaching Departments were started. The Departments were shifted to spacious buildings in the main campus in 1972-73. During ninety years of its existence, the University has progressed satisfactorily and doing well in the midst of constraints of different sorts. This has been possible because of futuristic vision about higher education of the personalities who adored the chair of Vice-Chancellor of this University. Their determination and dedication helped a lot in progress of this University.

Presently University comprises of Thirty-nine Postgraduate Teaching Departments (PGTD), three Constituent Colleges/Institutions (Law college, Laxminarayan Institute of Technology, and College of Education). Eight hundred forty-two colleges are affiliated The Department and conducted college/Institution buildings are spread over in 11 campuses with an overall area of 318 acres. Following programs under various faculties are run through the above-mentioned PGTD, Conducted College and Affiliated Colleges.

Department of Physics

The Department came into existence in 1963 along with other Science Departments for imparting post-graduate education and for promoting research. Research activities of the Department are mostly focussed on materials science research and have grown steadfastly since its inception, expanding into areas of functional materials for Fuel Cell, batteries, Sensors and Energy harvesting materials and So on. Department is actively involved in R & D as well as consultancy project and has also collaborations with several R & D organization in the India namely UGC-DAE-CSR, Indore; RRCAT, Indore; NEERI, Nagpur; IISER, Pune etc as well as outside the India with Penn State University, State College, USA; Institute of Energy and Climate change, Forchunszentrum Julich GMBH, Germany. The laboratories are adequately equipped with State-of-Art facilities. Infrastructure comprises of wide variety of structural and Electric and dielectric Characterization for AC/DC measurement technique with high temperature characterization capability. Computational facility workstations with advance configurations are also available.

Dielectrics class of materials also referred as polar materials, include Piezo, pyro and ferroelectrics materials, play key role in modern technology, finding its applications in data storage, energy harvesters and wireless communications. This symposium will address developments in materials for a wide range of related technologies. It will bring together expert from diverse discipline and broadly cover materials and device related in the field. Special tutorial sessions will be arranged for young researchers and initiators to provide core research information. The Topics of Seminar is broadly classified into five areas.

I. Fundamentals of dielectrics, ferroelectrics & related materials

- Relaxor and birelaxor ferroelectrics/dielectrics and disorder effects
- Ferroelectric tunneling junctions, ferroelectric and magnetoresistive barriers.
- Domain and domain wall engineering (functional domain walls)
- Ionic and electronic phenomena in ferroelectrics
- Surface and interface tailoring and basic emergent phenomena Topological states
- Topological states
- Multiferroics & magnetoelectrics, magnetoresistive phenomenon

II. Materials design and processing

- Bulk materials, Thin films, heterostructures, composite, nanofibers and multilayers
- Textured materials
- Film processing technologies (preparation, characterization)
- Patterning methods (net-shape forming, microfabrication)
- Biomaterials and Lead-free systems
- Hybrid materials
- Low-energy sintering

III. Characterization of polar materials

- Fundamental phenomena probed by scattering techniques (X-ray and neutron scattering)
- Electron microscopy (surface and interface phenomena, in-situ studies of domain switching)
- Raman and optical spectroscopies
- Local phenomena by scanning probe microscopic techniques
- Optical near-field imaging
- Spectroscopic probing of electrochemical phenomena
- Electrical and electromechanical characterization

IV. Applications of ferroelectrics and dielectrics

- Dielectrics, Ferroelectrics and antiferroelectrics for energy applications
- Medical ultrasound transducers, ultrasound actuators, and sensors for harsh environments, sound absorption materials
- Ferroelectric memory materials and devices
- Piezoelectricity (high-performance and lead-free piezoelectrics, piezoelectric polymers, MEMS and other integrated piezo-devices, sensors and actuators)
- Pyroelectric materials and devices
- Optical phenomena tuning: photonic band-gaps, luminescence and phosphoresces materials
- Biomaterials (hydroxyapatite, polypeptides, etc.)
- Relaxor dielectrics, ferroelectrics and smart materials

V. Theoretical modelling in dielectrics

- Phenomenological Analysis of dielectrics and ferroelectrics
- Nonliarity and scaling behaviour in non-linear dielectrics
- First principle and Ab initio studies in dielectrics, ferroelectrics, piezoelectrics and multiferroics.

THEME AND EXPECTED OUTCOMES OF THE WORKSHOP

“The real source of wealth and capital in this new era is not material things...it is the human mind, the human imagination, and our faith in the future.”

– Steve Forbes

We all know that in the 21st century, the cornerstones of the economy would be ideas, innovation and social empowerment that would drive the engine of growth and steer the country towards prosperity. This makes the theme of the workshop, “ Innovation, Social Entrepreneurship and IPR” more relevant today than it ever was before. The government has also introduced a number of reforms to fan the spirit of enterprise of the Indian youth and now the onus lies on Higher Education Institutions (HEIs) to provide a platform for the entrepreneurial aspirations of the young minds of the country. Learning cannot be divorced from innovation and we cannot expect to produce different results if we continue to do what we did yesterday. A paradigm shift is required in the field of higher education where the focus should be on producing more job creators rather than just job seekers, more leaders rather than mere followers. As is often said, in order to be a part of the solution, one should also be able to engage with the problems and address them. We cannot turn a blind eye to the fact that despite the demographic dividend that India enjoys, the vast potential of our youth’s entrepreneurial spirit and innovative fervor still remains untapped.

If the arena of innovation still remains barren in India, it’s not due to dearth of ideas but due to the fact that the research culture and innovation ecosystem in our Institutions still leave a lot of room for improvement. Even if a student has an idea with him, he doesn’t get the required guidance, support and mentorship from his teachers to convert his idea into a business proposition. This is because the teacher is as uninitiated and clueless as the student about the strategies and the business design required to take the idea forward and convert it into a “manufacturable and marketable form”. Thus, Many a brilliant idea with a potential to change our lives could never see the light of day. Who knows how many Steve Jobs and Bill Gates we could have produced if the idea could have been taken to its logical end? If we look around us, we can see how small ideas have changed the way we travel, the way we shop, the way we order food, the way we get our medicines etc. Many of these ideas have given rise to social enterprises which have touched the lives of our rural folk. The future eventually belongs to those who hold control over Intellectual Property. In an attempt to give a proper platform to the ideas of the young minds of the Region, Raman Science Centre, Nagpur, Vigyan Bharati, and Vidarbha Industries Association (VIA) have started the project Nutan Avishkar Vichar in Nagpur (NAVIN). Happy to share with you that some ideas of the students of the region are being funded and incubated by NAVIN. Hopefully, some of these end processes and products will also get patented and converted into start-ups.

Winston Churchill once said, “Never let a good crisis go to waste”. We can see the dark clouds looming in these unprecedented times but the only way to make the best use of the silver that lines these clouds is through the power of innovation. This National Workshop (WEBINAR) aims at addressing some of these issues, and especially the important role the Teachers can play in mentoring and encouraging our students.

We hope that this small initiative from us will trigger someone’s imagination culminating it into a very constructive contribution to our society at large. As Steve Jobs so aptly puts it, “Innovation has nothing to do with how many R&D dollars you have...it’s about the people you have, how you’re led and how much you get it.”

Who Should Attend?

Principals, Faculty Members, Innovators, Researchers, budding entrepreneurs and Interested students.

Innovative Students' Workshop on

'Design, Fabrication and Repairing of Physics Laboratory Equipments' during Oct. 03-08, 2018

REPORT ON WORKSHOP

Objectives:

- To provide sufficient background and theoretical knowledge to the participants regarding the regulated power supplies and other important knowhow.
- To inform how to do a better contact using soldering.
- To provide information regarding high tension lines, earthing & common ground.
- To demonstrate actual design and fabrication of a simple power supply and its regulation.
- To develop low cost and easy to handle AC and regulated DC power supplies using IC LM317.
- To repair the faulty power supplies existing in the Physics Laboratory.
- To develop/prepare cost effective CRO input wire sets using BNC pins and crocodile clips with an edge over its quality of wires and soldering.

To provide the participants skill based hands on training to develop new equipment.

Introduction

The Department of Physics has organised the said workshop designed and conducted by Lt. Dr. P. W. Ambekar for the second time. The main motto of the workshop is to motivate students towards research and innovations apart from the regular study. The selection of the students for the workshop is made on first come first serve basis besides keeping main criteria of clear passing in earlier examination. Nominal fees of Rs 100/- per students participation is applied to every student. The timings for the workshop were kept as per the wish of the students and their full time availability viz. 11.00 am to 5.00 pm with a snack break at 1.30-2.00 pm.

The Practice

The workshop provided the hands-on training to the participants by covering the theoretical sessions on following manner:

Day 01:

An introduction to AC and DC systems is demonstrated at the beginning. Thereafter basic electrical/electronic components verification and related applications were taught. Training related to parameters and properties of the electric quantities were explained. AC mains and power supplies and DC power supplies were explained and theory related to the same was taught as per the understanding of the students.

Practical:

To develop an interest and confidence among students the faulty power supplies were opened and tried to develop a logical fault findings.

Day 02:

The power supplies were checked and as per the needs they were opened. The circuits were detached and practice of learning it by drawing their circuit diagrams. Checking of components such as diode, capacitor, transformer, led/ neon lamps and switches such as toggle switch and main switches etc were taught and the use of multimeter and soldering gun were demonstrated.

Day 03:

All the participants were divided in to 5 groups consisting of two students in each group. Every pair were provided with individual soldering assembly, multimeter, PCBs and basic component set including connecting wires and sleeves.

Designing the regulated power supply and theory related theory were demonstrated and asked all the participants to make their own design, and fabricate the same with all possible precautions those were taught. Finding the terminals of components and Designing of layout of pcb and board Drilling and cutting were conducted.

Day 04

The students were asked to develop their own bridge rectifier and filter circuits with IC regulation. Almost all the pairs were ready with the designed assembly. These assemblies were then tested. The tested assemblies were then equipped with regulation using potentiometer wirings to the regulated IC.

Day 05

Most of the participants designed and developed their assemblies as per the instructions. Many of them were busy with repairing the old non-functioning power supplies and they repaired them with all possible methodologies. The designed and repaired assemblies were then checked for final use. Measurement of output ac and DC voltages with regulation and important Safety precautions while connections were checked. Many participants developed new instruments/kits for multifold experimental practice with minimal complications.

Day 06:

On the last day of the work shop, remaining work completion and finishing of the products were conducted. The workshop is concluded with a small Valedictory Function in presence of The Principal of the Institute, Dr. Akhilesh Peshwe Sir and Head of the Department , Dr. Mrs. Seema Ubale madam. Every individual participant were asked to give feed back of the workshop online and also ask to say few words during the valedictory function.

After the completion of the workshop every students displayed their products to the entire college staff and students in an exhibition cum display of fabricated and repaired devices.

Dr (Mrs) S. A. ACHARYA
PROFESSOR

Department of Physics, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur and the Materials Research Society of India, Nagpur Chapter had jointly organized one week National School on Computer-Assisted Spectroscopic Data Interpretation Techniques (NSCSDIT - 2019) in collaboration with Shri Shivaji Science College and Dharampeth M. P. Deo Memorial Science College, Nagpur at Department of Physics, RTM Nagpur University during January 7th - 11th, 2019.

Department of Physics, RTM Nagpur University

The sole activity of the school was Hand-on training on Spectroscopic data interpretation softwares. Such type of activity is first time organized in India and is brain child of Convener Smita Acharya. The school is attended by 101 young scientists from IITs, NITs, IISER, State and Central Universities and CSIR research laboratories from all over India. The five days School consists of 1-planery talk, 14-Tutorials, 6 lab sessions, 3 popular talks and 24 posters presentation. Spectroscopic data fitting software Demeter, Full prof, Vesta, XPSPEAK, CASAXPS, Origin Pro, FIT2D and NOVA has been covered during hand-on training sessions. Desktop has been provided to each participant for the software training.

The school was inaugurated in presence of Dr S M Yusuf, Director Solid State Physics Division, Bhabha Atomic Research centre, Mumbai and Dr Sivswaroom, Divisional Director, IGNOU Nagpur. In Inaugural address Dr S M Yusuf has enlightened the young mind with his national initiative at BARC to start neutron diffraction research in India. He explained spectroscopy is back-bone of most of experimental techniques, the needs of such school to improve quality of research. The experimentation and data interpretation are basic pillars of research, understanding the correct ways of experimentations and accuracies of data interpretation is crucial to emerge out good quality of research output and make research world competitive. Dr Sivswaroop has also explained the Importance of data interpretation in experimental research with giving examples. The Convener of the School, Dr. Smita Acharya, Professor, Department of Physics RTM Nagpur University has introduced the theme of the school "spectroscopic methods have been the oldest experimental techniques used in Physics, Chemistry, Materials Science and few other branches. The knowledge of these techniques led to understand of fundamentals. The field of spectroscopy deals with the study of interaction of radiation with matter. There have been great developments in the instrumentation of spectroscopic techniques. Similarly with the advances of computer science the analysis of data collected from spectroscopic experiments has become faster, more accurate and highly sophisticated.

The scientific programme of the School has been conducted by eminent Scientist, Academician and industrial professional from IUC-DAE-CSR, Indore, BARC Mumbai, ICMET Pune,

Department of Physics, RTM Nagpur University

TIFR Mumbai, RRCAT Indore, IIT Kanpur, IIT Guwahati, Metrohm, Toshvin, Raga Tech, Pune, Hioki Electronics etc. Key-note address was delivered by Dr S M Yusuf, Director, Solid State Division BARC on topic understanding of Magnetic Phase transition by Neutron Diffraction. Invitation

We take immense pleasure in inviting Principals, Directors, IQAC Coordinators, IQAC members and other stake holders of Higher Education Institutions and Universities from all over India to participate in the two day National Seminar on **"Measuring Outcomes, Good Documentation; Innovations and Best Practices"** on 24th & 25th February, 2019 for keeping up the tradition of continuous quality initiatives, organized by IQAC Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur in collaboration with IQAC's of Shri Ramdeobaba College of Engineering & Management, Nagpur, Dharampeth M.P. Deo Mem. Science College, Nagpur, Dr. M.K. Umathe College, Nagpur, Santaji Mahavidyalaya, Nagpur & Matru Sewa Sangh Institute of Social Work, Nagpur.

About the Seminar :

The establishment of the National Assessment and Accreditation Council (NAAC) in 1994 and its subsequent efforts through its continuous guidelines for quality enhancement and quality sustenance for Higher Education Institutions (HEI) and rigorous assessment and accreditation process brought about a positive change in the overall working & outlook of the HEI's. Institutions of Higher Education have become more organized in planning, implementation and expected outcomes of the programmes and activities they undertake.

Most of the HEI's have atleast once gone through NAAC's assessment and accreditation process. Thanks to NAAC, there is now a healthy competition going on amongst HEI's to outdo one another in quality enhancement and quality sustenance initiatives. With the introduction of new A & A methodology from July 17, it has now become imperative for HEI's to get even more organized and systemize the quality enhancement measures that they undertake and learn to think out of the box. The Data Validation and Verification (DVV) and the weightage it carries has made it essential for HEI's to properly document the programmes and activities they plan and implement.

In order to score well in both the Qualitative and Quantitative Metrics the HEI's need to meticulously plan and properly implement their quality initiatives with clear outcomes.

Delegation Fee : 600/- (only for the Participants from affiliated Colleges)

Aims & Objectives :

The main objective of this seminar is to bring the minds from across the nation together in order to discuss and facilitate the participants about how to measure Programme Outcomes, Course Outcomes, Programme Specific Outcomes. The seminar also aims to facilitate good documentation required while submitting SSR. The seminar will also create larger awareness among all about Innovation and Best Practices and touch upon the core of the new assessment and accreditation process and how to cope with the challenges.
