

**What is Vermicompost?**

- Vermicompost is the product of the composting process using various species earthworms, to create a heterogeneous mixture of decomposing vegetable or food waste, bedding materials, and vermicast. This process of producing vermicompost is called vermicomposting.
- Vermicast also called worm humus or worm manure is the end-product of the breakdown of organic matter by an earthworm.
- Vermicast contain a higher saturation of nutrients than do organic materials before vermicomposting.

**DON'T WASTE  
SOLID WASTE  
RECYCLE IT,  
REUSE IT**
